SKILLS

Programming: Python, C++, SQL

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Systems & Tools: MCP, Git, GitHub, REST APIs, WebSockets, DuckDB, Google Cloud Platform, SmartAPI (Angel One)

Concepts: Multithreading, Real-Time Data Processing, Event-Driven Systems, Machine Learning, Prompt Engineering

EXPERIENCE

GeeksforGeeks – Remote

Mar 2024 – Apr 2025

Campus Ambassador

- Led campus engagement initiatives, increasing active users from 40 to 600 through mentoring sessions, workshops, and coding contests.
- Collected student feedback and translated it into actionable outreach strategies to improve platform adoption.
- Reduced marketing expenditure by \$1,500+ by replacing paid advertising with community-driven initiatives.
- Collaborated in monthly planning and review meetings to align growth strategies with organizational goals.

EDUCATION

Jawaharlal Nehru National College of Engineering, Shimoga

Sep 2023 – Present

B.E. in Computer Science and Engineering

CGPA: 8.61/10

PROJECTS

- **StockSurge – Real-Time Stock Volume Surge Detection System**
 - Developed a Python-based low-latency real-time stock monitoring system capable of tracking 25+ stocks simultaneously using Angel One SmartAPI WebSocket.
 - Designed a rolling-average-based surge detection mechanism to identify abnormal buy-volume activity from live market data streams.
 - Implemented thread-safe WebSocket processing and Telegram alert integration for near real-time market alerts, contributing to ₹65,000+ in data-driven trading profits.
 - **Technologies & Tools Used:** Python, SmartAPI WebSocket, Telegram Bot API, Multithreading, WebSockets
- **AI-Driven Data Analytics & Voice-Interactive Visualization Platform**
 - Led a team in developing an AI-powered data analytics platform enabling users to upload CSV datasets and perform natural language-based analysis with voice input support.
 - Contributed to frontend feature development including intelligent chart visualization logic, voice interaction workflow, and PDF report generation using React, FastAPI, DuckDB, and Google Gemini API.
 - **Technologies & Tools Used:** Python, FastAPI, React, DuckDB, Google Gemini API, Pandas, Recharts, jsPDF
- **NeuroAuth AI – Hybrid EEG & EMG-Based Human Computer Interaction Authentication Framework (Research & Design Phase)**
 - Conducted literature review and system design research for a multimodal biosignal authentication framework combining EEG-based intent validation and EMG-based gesture-password recognition using sequential fusion.
 - Planned preprocessing, feature extraction, Random Forest-based classification, and dashboard interaction workflows for secure human-computer authentication.
 - **Technologies & Tools Used:** Python, Machine Learning, Scikit-learn, NumPy, Pandas, Random Forest Classifier, EEG/EMG Signal Processing, Upside Down Labs DIY Neuroscience Kit Pro

AWARDS & CERTIFICATIONS

- 1st Place – IEEE HireQuest (Best Hire Candidate Award) – 2026
- 1st Place – IEEE HireExperience (Best Hire Candidate Award) – 2025
- 1st Place – IEEE Android Development Hackathon – 2024
- Silver Medal – NPTEL Demystifying Networks – 2024
- Employability Skills Development Program – Naandi Foundation – 2026
- Product Management Virtual Simulation – Electronic Arts – 2023
